EDUCATION

The University of Central Arkansas, Conway, Arkansas

Bachelor of Business Administration

Aug 2021 - May 2025

- Major: Computer Information Systems
- Minor: Computer Science

Technical Skills

Languages: Python | SQL | Bash | C++

Data & Databases: PostgreSQL | MySQL | Snowflake | dbt | pandas | SQLAlchemy | PyArrow | aiohttp

Cloud & Tools: AWS S3 | Docker | Apache Airflow | Power BI | Excel | Git | Linux/Unix | REST APIs | asyncio

Projects

TMDB Movie Data Pipeline:

- Async **ETL pipeline** extracting **1M+** movies from **TMDB API** via concurrent batching requests (aiohttp, asyncio, 50-thread semaphore); staged through **medallion architecture** on **AWS S3**, bulk loaded into **Snowflake**
- Modeled **star schema in dbt** (1 fact, 4 dims); orchestrated by an **Airflow DAG** containerized with **Docker**, with S3 checkpointing for fault-tolerant extraction across 1.1M movie IDs
- Validated with 28 **pytest** + 14 **dbt tests** | *Python, AWS S3, Snowflake, dbt, Airflow, Docker, PyArrow, pandas*

Medicare Analytics Pipeline:

- Ingested **9.66M** CMS Medicare claim records into a **PostgreSQL** data warehouse via bulk **COPY INTO** for optimized load performance
- Designed a **Kimball-style star schema** in dbt with fact and dimension tables for efficient analytics
- Developed a **Power BI dashboard** delivering state-level insights — providers bill ~4x Medicare reimbursement; Alaska #1 at \$101/service
- Validated with 22 **pytest** tests | *Python, PostgreSQL, dbt, Power BI, pandas, psycopg2*

Work Experience

Walmart Online Grocery Associate

May 2022 – May 2025, January 2026 - Current

- Managed high-volume online grocery fulfillment operations, accurately picking and staging customer orders while maintaining productivity, order accuracy, and service-level expectations.
- Utilized Walmart's inventory and order-management systems to locate merchandise, identify inventory discrepancies, and resolve substitutions or out-of-stock items to support efficient order fulfillment.
- Coordinated with sales-floor and fulfillment associates to replenish inventory, prioritize time-sensitive orders, and maintain product availability across a fast-paced retail environment.

TaxPro Software Support Analyst

June 2025 – November 2025

- Queried MySQL databases to generate client-facing reports, supporting data analysis and troubleshooting for software support cases.
- Delivered data-focused presentations—utilizing Excel—to elected county Tax Collectors at the 2025 User's Conference.
- Developed a Positive Pay export-file system capable of distinguishing between tab-delimited, comma-delimited, and fixed-length formats using the organization's proprietary web toolkit
- Developed automation scripts in Bash using tools like grep, awk, and cron jobs to streamline routine data-processing tasks and improve workflow efficiency.
